HYDRANT FLUSHING

The Greenburgh Water Department announces the annual maintenance program to operate and flush fire hydrants for the week beginning Monday, October 17, 2016 thru Friday, October 21, 2016 **beginning in the Knollwood Area**. This action is necessary to make sure the fire hydrants are in good working order in case of emergencies and to help flush sediment out of the distribution system.

The hydrant flushing and operating action will take place during the day from 9:30 A.M. to 2:30 P.M. Greenburgh Water District Customers in the neighborhoods listed and the immediate vicinity should expect temporary periods of discolored water and lowered pressure resulting from this maintenance operation. This discoloration consists primarily of harmless silt and air and does not affect the safety of the water. For further information, customers may contact the Greenburgh Water Department at 914-989-1900 or visit the Town website www.greenburghny.com.

KNOLLWOOD AREA

MAYFAIR ACRES, including roads near Knollwood Road, Manor Drive, Buena Vista Drive and Chelsea Road.

PARKWAY HOMES, including roads near Hillside Avenue, Old Tarrytown Road, North Road, South Road, Maryton Road, Lawrence Drive, Virginia Road.

VALIMAR

WYNDOVER PARK, including roads near Old Kensico Road, County Center Road, Winnetou Road, and The Woodlands.

Please be advised that flushing may cause water pressure variations and discoloration of water. This does not represent a health hazard. However, customers are cautioned to determine if the water is clear before washing clothes (or any other processing) as staining may occur. If you experience discoloration in your water after crews have been flushing in your neighborhood, clear the pipes in your home by running cold water faucets for a few minutes. The water is absolutely safe. However, to avoid any inconvenience, we suggest you monitor the water before doing any laundry and keep water in the refrigerator for drinking and cooking.
